Dear Hiring Team,

With the utmost eagerness, I want to express my interest and passion for the **Software Development Engineer** role at your company. As someone who is passionate about software engineering and technology with strong applied acumen, I know my versatile skills and qualifications will make me an asset to the team.

As you will find on my resume, I have had a variety of experiences with many different roles in **Software Development** from my time at **Amazon** and other roles. I am looking to make the next step in my career by leveraging my **Software Development** and **Computer Science skills** to increase customer/client engagements within your company.

As a prospective engineer, I immediately can bring the following qualities to the team:

Previous Software Development Experience: In my previous experience as a System Development Engineer at Amazon, I worked on a multitude of projects which have helped customers/merchants to integrate better with Amazon Pay. I worked on SDKs in several languages which are hosted on GitHub for merchants to clone and use, nearly all of the 150k+ merchants generating a revenue of \$10mn+ directly or indirectly use the SDKs. Apart from this I was also responsible for creating, architecting and designing many external and internal tools to help the customers.

Knowledge of Software & Tech: I've had not only experience in Software and Tech but also have attained the business acumen to know how to collaborate with teams on consultative scales. Throughout my experiences, I've been able to provide technical solutions and present recommendations to senior management leaders including VPs. My passion for customer success and tech achievement align with your company's values and would be an asset for your company.

While my resume provides a quick summary of my experiences, I hope to have the opportunity to share how I can bring value to your company's needs.

Sincerely,

Sharath Kamlekar
